WEDNESDAY EVENING, NOV'R. 28.

A NEW MOTOR. -For the last six months Messrs, William Huston and Henry Wicker DRESS GOODS, sham, of Wilmington, Del., have been quietly constructing a motor that was to have been practically tested on the Rising Sun branch of the city railway Friday, but which, owing to the weather, was not. Steam engine, one would naturally call it, but this the inventors disclaim, as they say it is more of a steam machine than an engine. Steam is generated in a large boiler, which occupies the centre of a car track, and is passed to cylinders on each axle, the latter moving with the wheels and thus the machine is propelled. The principal idea of the inventors is to make a simple motor that will never get clogged with dust as is the case with others. This, they believe, has been accomplished in their machine, as the whole machinery is hermetically scaled in a cylindri-cal box on the axles. The whole thing occupies but about six feet of space, and is intended to pull the car that may be attached to it. It was not designed to be noiseless, but this result, it is said, can be easily accomplished, and a car is now in course of construction on which a machine similar to that mentioned above will be placed, and will make no noise.

The inventors are both gentleman who for years have been engaged in the business of machine making, and by such experience the ideas embodied in their new motor have been brought out.

CHROMO PHOTOGRAPHY.

By this art an ordinary Photograph can be transformed into a FINELY FINISHED ART PICTURE, strongly resembling Porcelain Miniatures, and attracting the admiration of all beholders. Yet all this can be accomplished at a very slight cost by any person of ordinary skill and intelligence, and a picture of compara-tively trifling cost, rendered fifty times more valuable at a very small outlay of time and ma-

This art is particularly adapted to ladies and others who are seeking light employment, whether for amusement or profit, and especially those who have skill in, or taste for, using oil or water colors, though it can easily be learned by all.

No acquaintance with photography is neeeded
to produce these pictures. If sold they readily command \$3 for card size and \$5 for cabinet size, each, with frames.

Briefly, the process consists in transferring the photographic print to a convex glass, manufactured expressly for the purpose, which is done by the use of the Adhesive Preparation, accompanying Brownell s outfit.

It is then rendered transparent by means of the Diaphanous Liquid, (sold only in connection with Brownell's outfit,) and another glass being used, the picture is colored and finished in the manner elaborately and fully described in the Instructions accompanying the outfit, which are improved and more complete than any other details which have been given to the public. Directions for mixing and using both Oil and Water Colors are given, in addition to other necessary items, with Brownell's outfit—a neat Black Walnut Hinged Case, containing all materials necessary for this beautiful work, costing

only \$2.50 and \$5 00 each, according to size. With the Diaphanous Liquid, Transparency can be secured in twenty minutes. All materials for Chromo Photography, including Brownell's Outfits, Convex Glass, Velvet Frames, best quality, of all sizes and descriptions, Card Board, Colors, &c., &c., &c., are supplied wholesale and retail by GEO.
